

Just send us a fax of the design you need made. We'll promptly quote a price and lead time for you. Upon receipt of your order, we'll begin production of your custom product.

Ever since we ran that "FAX to FINISH" custom page in our catalog in 1995, We have recieved several faxes daily requesting quotes and giving us information on how to build those special details that make your home a little bit different than everybody else's. We have enjoyed creating literally thousands of unique, one-of-a-kind items for builders and homeowners all around the USA. We have recently come to find that we are very unique ourselves. We don't know of any other company that does the type and volume of items like this in nothing but maintenance free materials. There are mass producers out there, but few that do low volume, high quality specialties that we do.

The next few pages will show a small sampling of items that we have made. Maybe the next issue will show the product that you order.

Circle Top Louver with fluted trim, keystone & rosettes.
